

HD Medical, Inc.

## Corporate Fact Sheet

### Company Overview

HD Medical, Inc. is a medical device research and development innovator based in California, USA with Corporate Offices in Sydney, Australia and Research labs in Chennai, India. Since 2005 the company has designed and developed medical products for use in screening and early detection of cardiac conditions. Coming from a tradition of helping to promote personal and community health, through exceptional healthcare diagnostic products and solutions, HD Medical, Inc. is committed to delivering “Higher Dimensions in Healthcare”.

The company delivers its innovative diagnostic technologies and products through operations in the USA and Asia Pacific. HD Medical’s patented technologies and products offer a paradigm shift in clinical diagnostics. With HD Medical solutions, healthcare professionals see more patients and improve more lives. Enabling timely diagnosis, often the difference between life and death, inspires innovative products like the HD Medical ViScope®. This solution helps populations gain access to healthcare through more effective and rapid screening, while reducing personal healthcare costs by eliminating unwanted tests such as echocardiograms.

### Product/Market Overview

With the introduction of the ViScope®, HD Medical pioneers the concept of the state-of-the-art visual stethoscope. ViScope provides better functionality with high definition sound quality and the ability to “see what you hear” for “dynamic auscultation™”. Uniquely ViScope® leverages the sensitivity of the eye in addition to the ear yielding a more accurate diagnosis of patient conditions at the point of care. Additionally, the ViScope® amplifies sounds up to 30 times louder than traditional stethoscopes enabling auscultation in noisy environments and offers benefits to the hearing impaired.

The ViScope® is used by cardiologists, general practitioners, nurses, paramedics and medical students for a variety of applications including patient screenings and triage care for first response, ER, EMS, paramedic services, telemedicine plus teaching. ViScope® is also well suited to military requirements for troop health screenings and emergency field triage units. The ability to reduce the number of unnecessary treatments and more accurate referrals may also be of great interest to the cost containment strategies of insurance providers.

## Distribution Channels

With operations in the USA and Asia Pacific, HD Medical sells and supports its solutions through a multi-tiered distribution network. The company's development work includes designing products that can be used as add-on devices by OEMs, technology licensors and integrators. HD Medical prides itself on its responsiveness to partner needs.

## Board of Directors
